

## AcrySof<sup>®</sup> IQ IOL Brief Statement

### CAUTION:

Federal law restricts this device to sale by or on the order of a physician.

### INDICATIONS:

AcrySof<sup>®</sup> IQ Aspheric Natural (SN60WF) and AcrySert<sup>®</sup> Delivery System with the AcrySof<sup>®</sup> IQ Aspheric Natural IOL (SN60WS) Posterior Chamber Intraocular lenses are indicated for the replacement of the human lens to achieve visual correction of aphakia in adult patients following cataract surgery. These lenses are intended for placement in the capsular bag.

### WARNINGS:

Careful preoperative evaluation and sound clinical judgment should be used by the surgeon to decide the risk/benefit ratio before implanting a lens in a patient with any of the conditions described in the Directions for Use labeling. Some adverse reactions that have been associated with the implantation of intraocular lenses are: hypopyon, intraocular infection, acute corneal decompensation and secondary surgical intervention. Caution should be used prior to lens encapsulation to avoid lens decentrations or dislocations.

### PRECAUTIONS:

Studies have shown that color vision discrimination is not adversely affected in individuals with the AcrySof<sup>®</sup> Natural IOL and normal color vision. The effect on vision of the AcrySof<sup>®</sup> Natural IOL in subjects with hereditary color vision defects and acquired color vision defects secondary to ocular disease (e.g., glaucoma, diabetic retinopathy, chronic uveitis, and other retinal or optic nerve diseases) has not been studied. Do not resterilize; do not store over 45° C; use only sterile irrigating solutions such as BSS<sup>®</sup> or BSS PLUS<sup>®</sup> Sterile Intraocular Irrigating Solutions.

### ATTENTION:

Reference the Physician Labeling/Directions for Use for a complete listing of indications, warnings and precautions. The long-term effects of filtering blue light and the clinical efficacy of that filtering on the retina have not been conclusively established.
